

# SAS Textiles

Active Stretch

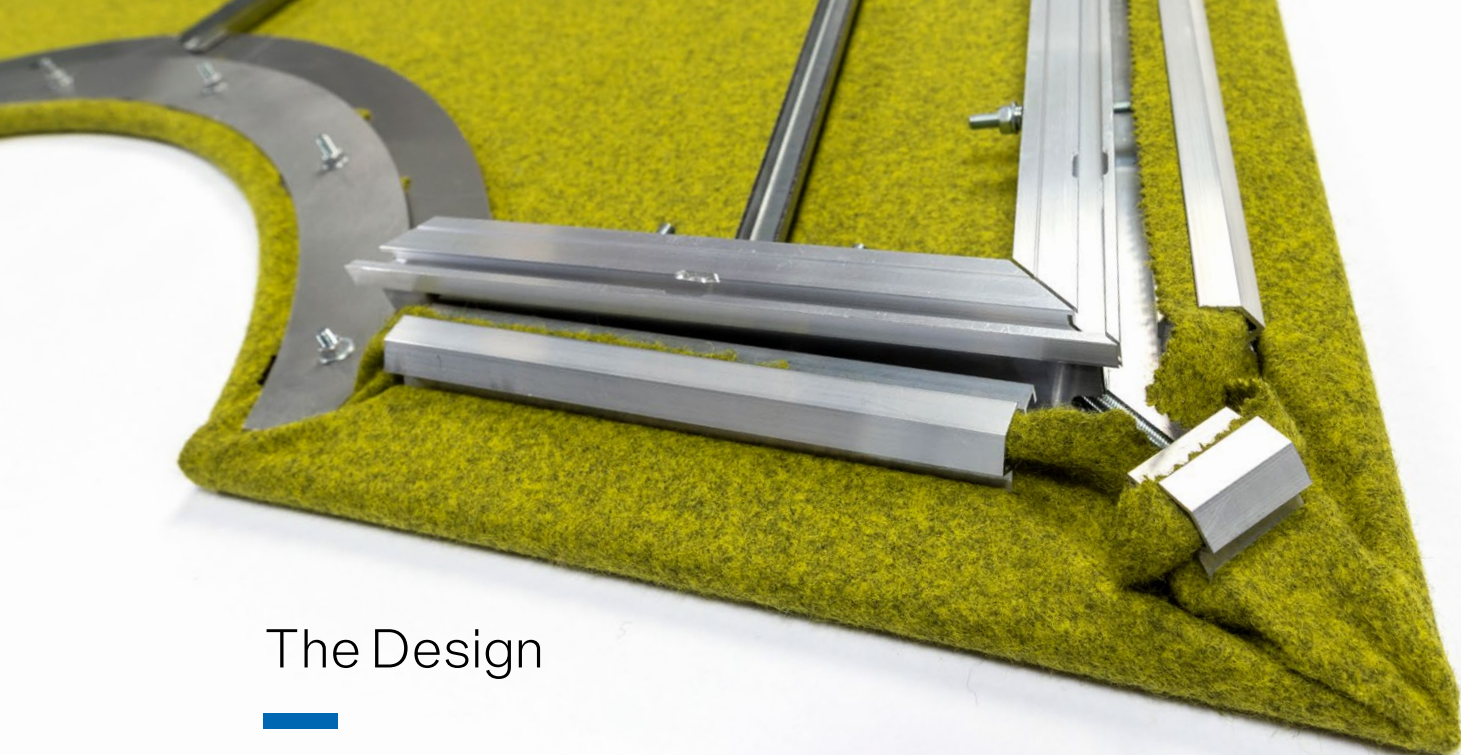

The Active Stretch system provides boundless geometric options to the growing trend of acoustic fabric ceilings. Our introductory range features Camira's famous Blazer, Blazer Lite, Lucia T2T, Quest, and Revolution fabrics.

Made in the UK, each element is sourced from recycled materials or is fully recyclable. SAS TexTiles compliment the full suite of SAS products including mesh, trims, and lighting. Our design department offers individual consultation to create new forms and flawless service integration.

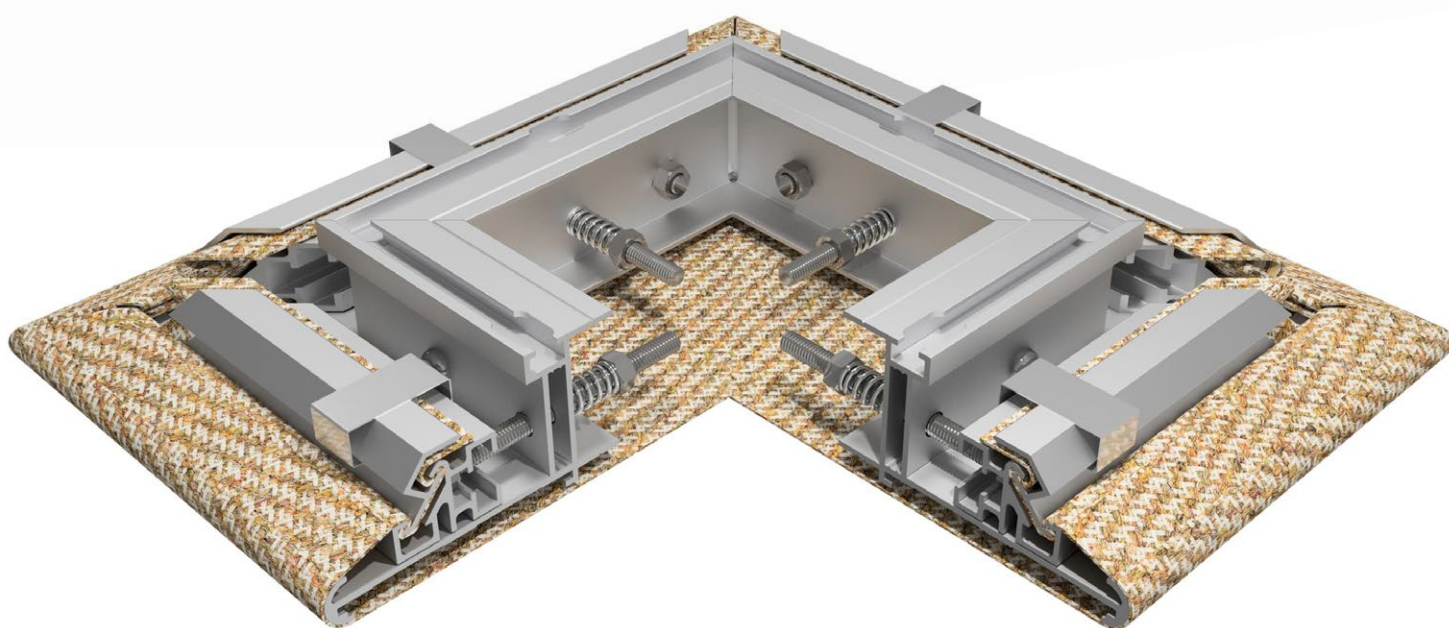

*Fabric: Quest - Salt*

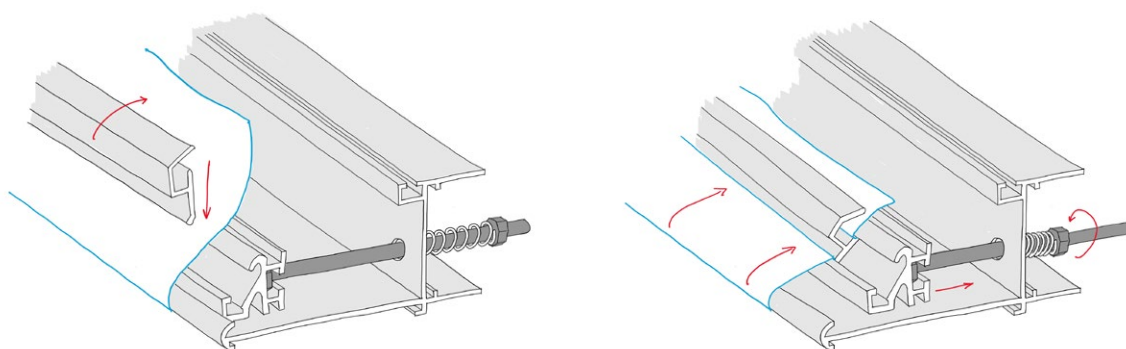

## The Design

SAS Active Stretch frames are reusable, adhesive-free, and easy to install. The patent-pending active design ensures multiple years of constant tension across a variety of complex silhouettes.

This product utilises spring force to keep the fabric in constant tension.

---

*Fabric: Blazer Lite - Happy (top) and Revolution - Evolve (middle)*

## Blazer

A close-up photograph of several rolls of Blazer fabric. The fabrics are in various shades of teal, blue, and red, showing a dense, felted texture.

A classic wool felt fabric made from premium New Zealand wool. The largest colour palette of 77 shades and milled to create a felted texture.

## Blazer Lite

A close-up photograph of several rolls of Blazer Lite fabric. The fabrics are in various shades of teal, blue, and red, showing a lighter, more open felted texture compared to the standard Blazer.

A finer and lighter weight version of Blazer in a wider width. Lightly milled and available in 30 mélange only colours.

## Lucia T2T

A close-up photograph of several rolls of Lucia T2T fabric. The fabrics are in various shades of green, grey, and white, showing a crêpe weave texture.

Made from 100% textile-to-textile recycled polyester waste from the fashion industry. A vibrant range of 31 bright colours in a crêpe weave.

## Quest

A close-up photograph of several rolls of Quest fabric. The fabrics are in various shades of blue and teal, showing a hopsack weave texture. A piece of white rope is draped over the top left corner.

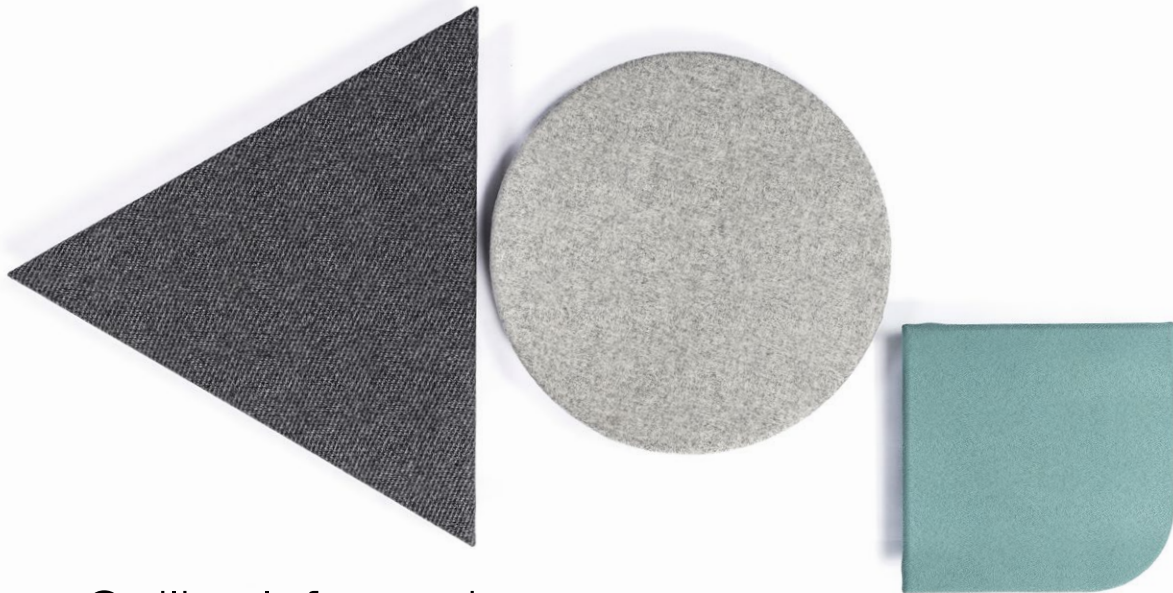

100% post-consumer recycled polyester including 75% SEAQUAL YARN from marine plastic pollution. A delicate hopsack weave in 27 colours.

## Revolution

A close-up photograph of several rolls of Revolution fabric. The fabrics are in various shades of brown, tan, and grey, showing a complex, textured weave pattern.

The first fabric produced using Camira's 'iinouilio' wool recycling technology. The 10 colourways give new life to Camira's waste wool yarn.

## Ceiling Information

SAS TexTiles Active Stretch are modular, easy to install, and compatible with standard SAS grid, trims and components. Available with linkage hinge-down void access, safety cables and touch-latch. The flexibility of this range provides creative freedom to experiment with lighting, trims, visible grid, and many other ceiling finishes including mesh and A-Maze.
